99.35
- **Dharamsinh Desai Institute of technology, Nadiad**
Computer Engineering pursuing
7.83

Skills

- C
- Python
- Django
- HTML5
- CSS3
- Bootstrap 4
- Javascript
- JQuery
- Php
- Angular 6
- Sqlite3
- MySQL
- MongoDB
- Nodejs
- asp.net mvc 5

Projects

- **Voter ID**
Developed voter ID website in python using django framework in which users are able to apply for a voter ID card online and for that they would require the following documents :one passport sized photograph,Identity proof this could be a birth certificate, passport, driving license, pan card or high school mark sheet. And after applying for voter ID card users can track their application. I was leader in this project. I've done front end part. This project we'd completed in 2 month.

- **E-tourism**

Developed E-tourism website in PHP in which users can get details of all the tourist places across the India and also we are providing them booking facility. I've done front end part and some back-end part in this project and we'd completed this project in one month.

- **Rhythm (music website)**

Developed rhythm music website using angular 6 in which user can listen all kind of songs, able to download song and also able to create their own playlist and much more. I've done front end part in this project and we'd completed this project in 2 month.

- **Star Social Blog**

Developed star social blog simple website in python using django framework in which user can join in the group and also leave the group,can create new group, can create new post in the particular group and readers can comment on the post. I have done this project within one month.

- **Simple Blog**

I have done this simple blog website in python using django framework in which user can read all the post. Admin can add new post and also able to do comment. If admin don't want to publish post then that would be saved as draft.
